

PASS VEC

Attesting to the compliance of factory production control

No. PASS0328

This attestation of conformity cancels and replaces the attestation n° PASS0262 dated January 18, 2013.

It has been established that the sealant-based bonding operation carried out in the following plant:

SCHMIDLIN-TSK AG – Andlauring 69 – 4147 AESCH - SUISSE

has been properly conducted and is subjected to satisfactory factory production control, according to a specified test programme, as laid down in Chapter 8 requirements of ETAG no. 002, parts 1 and 2, referred to, where appropriate, as an EAD (European Assessment Document), and CSTB Booklet no. 3488.

CSTB, a body notified under reference 0679 for tasks pertaining to the assessment procedure and the verification of constancy of performance of structural sealant glazing systems, has undertaken the initial inspection of the plant and factory production control, and conducts continuous surveillance, assessment and evaluation of factory production control.

This PASS VEC justifies that the components thus manufactured can be favourably admitted within the CE-marking of Structural Sealant Glazing Systems carried out under the responsibility of other manufacturers or façade plasterers.

Issued in Champs Sur Marne, on January 24, 2017
